

Project Progress Report Write-up

CS554: Data-Intensive Computing

Due: 11:59PM 11-08-2017

Overview

Your mid-term report will be an extension to your initial proposal that you wrote early in the semester. Your mid-term report should include the following information:

- Original Proposal
- New Section – Mid-Term Progress Report
 - Proposed solution
 - What have you completed so far (please include who did what)
 - Please include who did what
 - Include both successful and failed solutions
 - Discuss any challenges that were not anticipated
 - Future work over the next 3 weeks
 - Evaluation
 - What have you completed so far
 - It is important to list who did what, to make sure everyone is contributing
 - Future work over the next 3 weeks
 - Be specific with what experiments you are likely to run, what workloads, what testbeds, what scale, what metrics, etc; if you already included these in your original proposal, please revise the proposed evaluation with your new evaluation
 - Are you on-track with your original timeline? If not, can you re-adjust it to show the likely progress over the next 3 weeks?

Your new section “Mid-Term Progress Report” will likely be 1~2 pages (in addition to the original project proposal).
